

THOUSAND OAKS CITY COUNCIL

Supplemental Information Packet

Agenda Related Items - Meeting of May 21, 2024
Supplemental Packet Date: May 21, 2024

2:30 p.m.

Supplemental Information:

Any agenda related public documents received and distributed to a majority of the City Council after the Agenda Packet is printed are included in Supplemental Packets. Supplemental Packets are produced as needed, typically a minimum of two—one available on the Thursday preceding the City Council meeting and the second on Tuesday at the meeting. The Supplemental Packet is available for public inspection on the City's website at toaks.org/agendas or by contacting the City Clerk Dept at (805) 449-2151 during normal business hours [main location pursuant to the Brown Act, G.C. 54957.5(2)].

Americans with Disabilities Act (ADA):

In compliance with the ADA, if you need special assistance to participate in this meeting or other services in conjunction with this meeting, please contact the City Clerk Department at (805) 449-2151. Assisted listening devices are available at this meeting. Ask City Clerk staff if you desire to use this device. Upon request, the agenda and documents in this agenda packet, can be made available in appropriate alternative formats to persons with a disability. Notification at least 48 hours prior to the meeting or time when services are needed will assist City staff in assuring reasonable arrangements can be made to provide accessibility to the meeting or service.

Thousand Oaks City Council
City of Thousand Oaks
2100 Thousand Oaks Blvd
Thousand Oaks, CA 91362

Re: Cherry Tree Capital Partners Mixed-Use Development Proposal – Support

Dear Mayor Adam and Councilmembers,

On behalf of the 700+ members of the Greater Conejo Valley Chamber of Commerce representing over 40,000 local jobs, I am writing to support the proposed mixed-use development by Cherry Tree Capital Partners that utilizes a long-identified “opportunity site” to prioritize housing along Thousand Oaks Blvd.

Our Board of Directors has continuously voiced its support for projects that provide a greater diversity of housing options, appeal to young professionals, and complement the future Campus Master Plan. This development is poised to be one of those projects with a thoughtfully crafted balance of “front yard” park space, affordable units, residential amenities, and a strategic retail activation.

This proposal aligns with the city’s goal of implementing high-quality revitalization projects along Thousand Oaks Boulevard and continued support of affordable housing production with 44 units designated for lower-income residents. As we struggle with housing availability and affordability for our local workforce, 328 units are a meaningful step in the right direction as we work towards reversing the trend of being the most unaffordable county in the United States.

We thank you for your thoughtful consideration and believe the proposal merits the approval of the City Council.

Sincerely,

Danielle Borja, MBA
President/CEO
Greater Conejo Valley Chamber of Commerce

Re: Cherry Tree Mixed-Use Project – Support

Dear Mayor Adam,

On behalf of Takeda, a major employer in Thousand Oaks, we are writing in support of the Cherry Tree Mixed-Use project. In 2021, Takeda broke ground on a new 15,000 square foot manufacturing facility to grow its portfolio of treatments for rare diseases and renovate an existing 14,000 square foot manufacturing space; a \$165 million investment in our Thousand Oaks campus. As we work to expand our footprint, affordable housing is one of the biggest challenges for our Human Resources/Talent Acquisition department when recruiting talent from outside of the region. The mixed-use project offers appealing housing options. The project is aligned with the city's goal to increase both market-rate and affordable housing through high quality revitalization projects.

Takeda also appreciates the developer's focus on sustainable principles as we prioritize our own commitment to environment sustainability having recently installing a 7,000 photovoltaic array that will generate 40% of the site's electricity.

Finally, as a company that has been at the same location for more than 25 years, we are huge supporters of local growth. The Cherry Tree site has long been identified for a mixed-use project and its central location on the East end of the Blvd. will complement Santal and Tarantula Brewing Company. We are excited to see this area grow!

Thank you for your consideration.

Sincerely,

Elizabeth Dritz
Head of Manufacturing, Thousand Oaks Facility
Takeda Pharmaceutical Company Limited

Thank you so much Carlos! I appreciate you writing me back as I imagine you are very busy.

Please see below for my letter.

Dear Council,

I write this request with the understanding that our town does need additional housing, and that using the area available is essential to increase housing availability in our community.

My comment is about how that is done, not whether it is done at all.

I think of a sign that used to hang in the Borderline Bar & Grill, something along the lines of 'where the ranch meets the sea', and I think about the culture of our community. Our wide open skyline comes to mind as part of our identity. The fact that pretty much wherever you are in our beautiful valley, you can see the mountain ranges all around us, a reminder of where we are, and who we are, beautiful land, just a mountain from the sea. Nature is somewhere within reach, wherever you are. And that is beautiful.

I'm very lucky to have grown up here and feel fortunate that after living in Los Angeles for ten years, have been able to come back to raise my children here in Thousand Oaks.

The developments that have come about in recent years seem to have our town's culture in mind, with beautiful design that *feels* like Thousand Oaks, such as Rancho Serrano at 166 N. Rancho Road or 1710 On The Blvd.

Hearing that the new development proposed at 500 East Thousand Oaks Boulevard will be in some areas 5 stories tall, and the design looks like shipping containers stacked on top of one another, is a threat to our towns culture and history.

I appreciate the far setback from the boulevard, as well as the plan of parks along the road but the precedence of height on the blvd is especially alarming.

I humbly ask that you please take our open skyline into consideration when deciding about this plan. We need more housing, but these are decisions that will shape our town forever.

Hi Mr. Contreras,

If I am unable to attend the Public Hearing tomorrow, in regards to the new development proposed by Cherry Tree Development LLC, should I submit a letter to the City Council?

If the only way to participate is by being there in person, please let me know and I will attempt to get out of work early.

Also, is this development happening no matter what or does the City Council still needing to approve different aspects of this build?

Thank you very much for your time!

Best,
Shannon

Thousand Oaks, CA 91362

Subj: Letter of Support for Cherry Tree Development

Dear Honorable Councilmembers:

As long-time resident of the City of Thousand Oaks, and as an individual who has been directly involved in administering and updating the Master Plan of California Lutheran University, I strongly recommend that the proposed General Plan Update be approved by City Council.

Although I am not voicing the opinion of California Lutheran University, I can unequivocally say that the availability of housing in Thousand Oaks is a dramatic competitive disadvantage for the university, and that any added housing will be an benefit to the community, and this particular project with it's pedestrian-friendly design will add benefits towards creating a vibrant City.

Sincerely,

Ryan VanOmmeren

Thousand Oaks City Council
c/o Community Development Dept.
Attn: Mr. Kelvin Parker, Director
2100 E. Thousand Oaks Blvd.
Thousand Oaks, CA 91362

RE: Support for Agenda Item 10.A including recommendations # 1 through 4
Applicant: Cherry Tree Development, LLC ("Applicant")
Case No's: (SUP 2023-70011, DAGR 2023-70001, PTP 2023-70067, and
CEQA 2023-70004) ("Project")
Property Address: 500 E. Thousand Oaks Blvd. ("Property")

Dear Mayor Adam and Honorable Councilmembers:

On behalf of our Board of Directors of the Thousand Oaks Boulevard Association, this letter is intended to ***reaffirm*** our support for the above-referenced project; by providing a critical supply of housing to our community that is grossly underserved. The location of where this housing should go is equally as important in light of recent state legislation. Adoption of our 2045 General Plan Update, and the Property's classification as the largest "Opportunity Site" on Thousand Oaks Blvd.

Housing has been contemplated at this Property since the adoption of the Thousand Oaks Boulevard Specific Plan in 2011. Over the past 13 years there have been countless attempts to bring forward a project that would find a healthy balance between community needs, social wants, and economic feasibility. As we've all witnessed, the mere approval or allocation of Measure E units does not guarantee that those units will ultimately be built, or even make economic sense. This Council need not fear what market forces have already protected.

In 2017, the City Council voted 5-0 declaring this Property one (1) of *only* six (6) "Opportunity Sites" in the City of Thousand Oaks. As part of the Thousand Oaks Economic Development Strategic Plan, with the specific intent of utilizing and activating this Property to its highest and best use to address the current and future needs of our community.

In 2021 and 2022, this City Council voted on three (3) separate occasions, ***each time reaffirming*** support for mixed use housing at the Property. Those took place during the January 2021 prescreen, the May 2021 General Plan land use discussion, and on March 29, 2022, for an updated prescreen.

Again, despite the City Council's allocation of Measure E units market forces prevented the project from moving forward.

There should be no delusion or denial about the need for housing in our city. As we discovered over the past several years with the comprehensive General Plan Update, there is virtually no land left to build. Therefore, we must ensure that whatever is left is built without any exception, to its highest and best use for our future.

Our housing dilemma isn't new or novel. The problem has continuously gotten worse since 2011, 2017, 2020, 2021, 2022, and 2023 and now after a pandemic; with skyrocketing inflation and interest rates. Housing costs at never-before-seen highs, the shortage of affordable units, workforce units, and market rate units at near zero percent vacancy. We do not have the luxury to say no any longer.

Setting aside the demands from Sacramento and our RHNA obligations, the mountains of economic data from CLU and other respected and trusted institutions. All have concluded we are in an economic recession; and we haven't done our part to provide the minimal amount of housing supply necessary for our community to sustain itself.

Fortunately, the request before you this evening is related to a Property that all of us are familiar with and have supported for over a decade. We know that preserving the Oak Trees, undergrounding the high voltage utilities, and ensuring a proper flow and setbacks are a must. Additionally, the inclusion of affordable units would bring great community benefit and meet one of the City Councils top goals and priorities. The contemplated Project before you delivers on that vision and gives you the opportunity to put it into action.

Notably, the Project as envisioned now offers even more affordable units and has less massing, as compared to the previous application(s) over the past 13 years. If we want to protect our open space and single-family neighborhoods from broad statewide zoning, we must take real meaningful action, in good faith. To mitigate any desire to develop in those areas by instead encouraging, incentivizing, and implementing land use policies that support and direct our managed growth along Thousand Oaks Boulevard and the 101 corridor.

The members and small businesses of our Association have political fatigue from witnessing a multitude of applications. We urge you to look for ways to support this Project, despite any reservations about its size and/or height and ensure that the number of residences don't get reduced by a single unit. Once this Project is built, we won't have the luxury or opportunity to go back and wish we had approved additional units.

Beyond the considerations that warrant the support of this Project on its own merits, there are two (2) other reasons why this project must be supported by this commission for approval: 1710 E. Thousand Oaks Blvd and 299 E. Thousand Oaks Blvd. At the onset of these projects there was uncertainty about the precedent, demand for, and performance of these other mixed-use projects on Thousand Oaks Blvd. The "what ifs!".

As we'll all have witnessed over the past several years, both of those projects were immensely successful and nearly fully pre-leased before completion. The proof that there is an actual need, that our

residents and businesses do support and enjoy these types of pedestrian oriented projects, and the only downside is that the demand vastly outweighs the supply.

We respectfully request your approval of the applications in accordance with staff recommendation, as this Project meets the goals, objectives, and intent of the Thousand Oaks Boulevard Specific Plan. We urge you to look beyond simple numerical values, rather focus on the vast communal benefits as well as social, environmental, and equitable benefits this Project will deliver to our community.

We thank the City of Thousand Oaks for its continued support and commitment to transforming the Boulevard into a premier destination for our community to enjoy for generations to come.

Respectfully submitted,

T.O.B.A.

**RE: City Council Agenda Item 10.A – City of Thousand Oaks’
500 E. Thousand Oaks Boulevard Mixed-Use Project (SCH#:
2010011013).**

Dear Mayor Adam, Honorable Councilmembers, and Mr. Powers,

On behalf of the Western States Regional Council of Carpenters (“**Western Carpenters**” or “**WSRCC**”), our firm is submitting these comments in response to the City of Thousand Oaks’ (“**City**”) April 2024, Addendum to Final Environmental Impact Report (“**DEIR**”) for the 500 E. Thousand Oaks Boulevard Mixed-Use project (“**Project**”), which the City has associated with, and intends to incorporate into, the Thousand Oaks Boulevard Specific Plan – Amended November 2022 (“**SP**”).

The Western Carpenters is a labor union representing almost 90,000 union carpenters in 12 states, including California, and has a strong interest in well-ordered land use planning and in addressing the environmental impacts of development projects.

The proposed project contemplates a 609,633 square foot mixed-use development consisting of 328 residential units with a 50% Density Bonus providing 44 lower-income affordable units, including 8,500 square feet of commercial retail and restaurant space, linear park, pocket park, dog park, plazas, seating areas, and other amenities. The Project’s 328 residential units would be distributed across one 4-story mixed-use building, one 5-story podium-style mixed-use building, and one 5-story

podium-style multi-family residential building with maximum building heights ranging from 47 feet to 62 feet. The project includes 475 total parking spaces consisting of 16 surface parking spaces and two semi-subterranean parking structures comprising 32 commercial and 427 residential parking spaces. The project is comprised of five (5) parcels (Assessor's Parcel Numbers [APNs] 525-0-012-230, 669-0-201-030, 669-0-201-040, 669-0-201-050, and 669-0-201-105).

Individual members of WSRCC live, work, and recreate in the City and surrounding communities and would be directly affected by the Project's environmental impacts.

The Western States Regional Council of Carpenters expressly reserves the right to supplement these comments at or prior to hearings on the Project, and at any later hearing and proceeding related to this Project. (Gov. Code, § 65009, subd. (b); Pub. Res. Code, § 21177, subd. (a); see *Bakersfield Citizens for Local Control v. Bakersfield* (2004) 124 Cal.App.4th 1184, 1199-1203; see also *Galante Vineyards v. Monterey Water Dist.* (1997) 60 Cal.App.4th 1109, 1121.)

The Western Carpenters incorporates by reference all comments raising issues regarding the Environmental Impact Report (EIR) submitted prior to certification of the EIR for the Project. See *Citizens for Clean Energy v City of Woodland* (2014) 225 Cal.App.4th 173, 191 (finding that any party who has objected to the project's environmental documentation may assert any issue timely raised by other parties).

Moreover, the Western Carpenters requests that the City provide notice for any and all notices referring or related to the Project issued under the California Environmental Quality Act (**CEQA**) (Pub. Res. Code, § 21000 *et seq.*), and the California Planning and Zoning Law ("**Planning and Zoning Law**") (Gov. Code, §§ 65000–65010). California Public Resources Code Sections 21092.2, and 21167(f) and California Government Code Section 65092 require agencies to mail such notices to any person who has filed a written request for them with the clerk of the agency's governing body.

I. THE CITY SHOULD REQUIRE THE USE OF A LOCAL WORKFORCE TO BENEFIT THE COMMUNITY'S ECONOMIC DEVELOPMENT AND ENVIRONMENT

The City should require the Project to be built using a local workers who have graduated from a Joint Labor-Management Apprenticeship Program approved by the State of California, have at least as many hours of on-the-job experience in the

applicable craft which would be required to graduate from such a state-approved apprenticeship training program, or who are registered apprentices in a state-approved apprenticeship training program.

Community benefits such as local hire can also be helpful to reduce environmental impacts and improve the positive economic impact of the Project. Local hire provisions requiring that a certain percentage of workers reside within 10 miles or less of the Project site can reduce the length of vendor trips, reduce greenhouse gas emissions, and provide localized economic benefits. As environmental consultants Matt Hagemann and Paul E. Rosenfeld note:

[A]ny local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

March 8, 2021 SWAPE Letter to Mitchell M. Tsai re Local Hire Requirements and Considerations for Greenhouse Gas Modeling.

Workforce requirements promote the development of skilled trades that yield sustainable economic development. As the California Workforce Development Board and the University of California, Berkeley Center for Labor Research and Education concluded:

[L]abor should be considered an investment rather than a cost—and investments in growing, diversifying, and upskilling California’s workforce can positively affect returns on climate mitigation efforts. In other words, well-trained workers are key to delivering emissions reductions and moving California closer to its climate targets.¹

Furthermore, workforce policies have significant environmental benefits given that they improve an area’s jobs-housing balance, decreasing the amount and length of job commutes and the associated greenhouse gas (GHG) emissions. In fact, on May 7,

¹ California Workforce Development Board (2020) Putting California on the High Road: A Jobs and Climate Action Plan for 2030 at p. ii, *available at* <https://laborcenter.berkeley.edu/wp-content/uploads/2020/09/Putting-California-on-the-High-Road.pdf>.

2021, the South Coast Air Quality Management District found that that the “[u]se of a local state-certified apprenticeship program” can result in air pollutant reductions.²

Locating jobs closer to residential areas can have significant environmental benefits. As the California Planning Roundtable noted in 2008:

People who live and work in the same jurisdiction would be more likely to take transit, walk, or bicycle to work than residents of less balanced communities and their vehicle trips would be shorter. Benefits would include potential reductions in both vehicle miles traveled and vehicle hours traveled.³

Moreover, local hire mandates and skill-training are critical facets of a strategy to reduce vehicle miles traveled (VMT). As planning experts Robert Cervero and Michael Duncan have noted, simply placing jobs near housing stock is insufficient to achieve VMT reductions given that the skill requirements of available local jobs must match those held by local residents.⁴ Some municipalities have even tied local hire and other workforce policies to local development permits to address transportation issues. Cervero and Duncan note that:

In nearly built-out Berkeley, CA, the approach to balancing jobs and housing is to create local jobs rather than to develop new housing. The city’s First Source program encourages businesses to hire local residents, especially for entry- and intermediate-level jobs, and sponsors vocational training to ensure residents are employment-ready. While the program is voluntary, some 300 businesses have used it to date, placing more than 3,000 city residents in local jobs since it was launched in 1986. When

² South Coast Air Quality Management District (May 7, 2021) Certify Final Environmental Assessment and Adopt Proposed Rule 2305 – Warehouse Indirect Source Rule – Warehouse Actions and Investments to Reduce Emissions Program, and Proposed Rule 316 – Fees for Rule 2305, Submit Rule 2305 for Inclusion Into the SIP, and Approve Supporting Budget Actions, *available at* <http://www.aqmd.gov/docs/default-source/Agendas/Governing-Board/2021/2021-May7-027.pdf?sfvrsn=10>.

³ California Planning Roundtable (2008) Deconstructing Jobs-Housing Balance at p. 6, *available at* <https://cprroundtable.org/static/media/uploads/publications/cpr-jobs-housing.pdf>

⁴ Cervero, Robert and Duncan, Michael (2006) Which Reduces Vehicle Travel More: Jobs-Housing Balance or Retail-Housing Mixing? *Journal of the American Planning Association* 72 (4), 475-490, 482, *available at* <http://reconnectingamerica.org/assets/Uploads/UTCT-825.pdf>.

needed, these carrots are matched by sticks, since the city is not shy about negotiating corporate participation in First Source as a condition of approval for development permits.

Recently, the State of California verified its commitment towards workforce development through the Affordable Housing and High Road Jobs Act of 2022, otherwise known as Assembly Bill No. 2011 (“**AB2011**”). AB2011 amended the Planning and Zoning Law to allow ministerial, by-right approval for projects being built alongside commercial corridors that meet affordability and labor requirements.

The City should consider utilizing local workforce policies and requirements to benefit the local area economically and to mitigate greenhouse gas, improve air quality, and reduce transportation impacts.

II. THE CITY SHOULD IMPOSE TRAINING REQUIREMENTS FOR THE PROJECT’S CONSTRUCTION ACTIVITIES TO PREVENT COMMUNITY SPREAD OF COVID-19 AND OTHER INFECTIOUS DISEASES

Construction work has been defined as a Lower to High-risk activity for COVID-19 spread by the Occupations Safety and Health Administration. Recently, several construction sites have been identified as sources of community spread of COVID-19.⁵

Western Carpenters recommend that the Lead Agency adopt additional requirements to mitigate public health risks from the Project’s construction activities. WSRCC requests that the Lead Agency require safe on-site construction work practices as well as training and certification for any construction workers on the Project Site.

In particular, based upon Western Carpenters’ experience with safe construction site work practices, WSRCC recommends that the Lead Agency require that while construction activities are being conducted at the Project Site:

⁵ Santa Clara County Public Health (June 12, 2020) COVID-19 CASES AT CONSTRUCTION SITES HIGHLIGHT NEED FOR CONTINUED VIGILANCE IN SECTORS THAT HAVE REOPENED, *available at* <https://www.sccgov.org/sites/covid19/Pages/press-release-06-12-2020-cases-at-construction-sites.aspx>.

Construction Site Design:

- The Project Site will be limited to two controlled entry points.
- Entry points will have temperature screening technicians taking temperature readings when the entry point is open.
- The Temperature Screening Site Plan shows details regarding access to the Project Site and Project Site logistics for conducting temperature screening.
- A 48-hour advance notice will be provided to all trades prior to the first day of temperature screening.
- The perimeter fence directly adjacent to the entry points will be clearly marked indicating the appropriate 6-foot social distancing position for when you approach the screening area. Please reference the Apex temperature screening site map for additional details.
- There will be clear signage posted at the project site directing you through temperature screening.
- Provide hand washing stations throughout the construction site.

Testing Procedures:

- The temperature screening being used are non-contact devices.
- Temperature readings will not be recorded.
- Personnel will be screened upon entering the testing center and should only take 1-2 seconds per individual.
- Hard hats, head coverings, sweat, dirt, sunscreen or any other cosmetics must be removed on the forehead before temperature screening.
- Anyone who refuses to submit to a temperature screening or does not answer the health screening questions will be refused access to the Project Site.

- Screening will be performed at both entrances from 5:30 am to 7:30 am.; main gate [ZONE 1] and personnel gate [ZONE 2]
- After 7:30 am only the main gate entrance [ZONE 1] will continue to be used for temperature testing for anybody gaining entry to the project site such as returning personnel, deliveries, and visitors.
- If the digital thermometer displays a temperature reading above 100.0 degrees Fahrenheit, a second reading will be taken to verify an accurate reading.
- If the second reading confirms an elevated temperature, DHS will instruct the individual that he/she will not be allowed to enter the Project Site. DHS will also instruct the individual to promptly notify his/her supervisor and his/her human resources (HR) representative and provide them with a copy of Annex A.

Planning

- Require the development of an Infectious Disease Preparedness and Response Plan that will include basic infection prevention measures (requiring the use of personal protection equipment), policies and procedures for prompt identification and isolation of sick individuals, social distancing (prohibiting gatherings of no more than 10 people including all-hands meetings and all-hands lunches) communication and training and workplace controls that meet standards that may be promulgated by the Center for Disease Control, Occupational Safety and Health Administration, Cal/OSHA, California Department of Public Health or applicable local public health agencies.⁶

⁶ See also The Center for Construction Research and Training, North America's Building Trades Unions (April 27 2020) NABTU and CPWR COVIC-19 Standards for U.S. Construction Sites, available at https://www.cpwr.com/sites/default/files/NABTU_CPWR_Standards_COVID-19.pdf; Los Angeles County Department of Public Works

The United Brotherhood of Carpenters and Carpenters International Training Fund has developed COVID-19 Training and Certification to ensure that Carpenter union members and apprentices conduct safe work practices. The Agency should require that all construction workers undergo COVID-19 Training and Certification before being allowed to conduct construction activities at the Project Site.

Western Carpenters has also developed a rigorous Infection Control Risk Assessment (“**ICRA**”) training program to ensure it delivers a workforce that understands how to identify and control infection risks by implementing protocols to protect themselves and all others during renovation and construction projects in healthcare environments.⁷

ICRA protocols are intended to contain pathogens, control airflow, and protect patients during the construction, maintenance and renovation of healthcare facilities. ICRA protocols prevent cross contamination, minimizing the risk of secondary infections in patients at hospital facilities.

The City should require the Project to be built using a workforce trained in ICRA protocols.

III. THE PROJECT WOULD BE APPROVED IN VIOLATION OF THE CALIFORNIA ENVIRONMENTAL QUALITY ACT.

The California Environmental Quality Act (“CEQA”) is a California statute designed to inform decision-makers and the public about the potential significant environmental effects of a project. 14 California Code of Regulations (“**CEQA Guidelines**”), § 15002, subd. (a)(1).⁸ At its core, its purpose is to “inform the public and its responsible officials of the environmental consequences of their decisions *before they are made.*” (*Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553, 564.)

(2020) Guidelines for Construction Sites During COVID-19 Pandemic, *available at* https://dpw.lacounty.gov/building-and-safety/docs/pw_guidelines-construction-sites.pdf.

⁷ For details concerning Western Carpenters’ ICRA training program, *see* <https://icrahealthcare.com/>.

⁸ The CEQA Guidelines, codified in Title 14 of the California Code of Regulations, section 15000 *et seq.*, are regulatory guidelines promulgated by the state Natural Resources Agency for the implementation of CEQA. (Cal. Pub. Res. Code § 21083.) The CEQA Guidelines are given “great weight in interpreting CEQA except when . . . clearly unauthorized or erroneous.” *Center for Biological Diversity v. Department of Fish & Wildlife* (2015) 62 Cal. 4th 204, 217.

A. Background Concerning Environmental Impact Reports Under CEQA.

CEQA directs public agencies to avoid or reduce environmental damage, when possible, by requiring alternatives or mitigation measures. (CEQA Guidelines, § 15002, subds. (a)(2)-(3); see also *Berkeley Keep Jets Over the Bay Committee v. Board of Port Comes* (2001) 91 Cal.App.4th 1344, 1354; *Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553; *Laurel Heights Improvement Assn.*, 47 Cal.3d at p. 400.) To achieve this purpose, CEQA mandates preparation of an Environmental Impact Report (“**EIR**”) for projects so that the foreseeable impacts of pursuing the project can be understood and weighed. (*Communities for a Better Environment v. Richmond* (2010) 184 Cal. App. 4th 70, 80.) The EIR requirement “is the heart of CEQA.” (CEQA Guidelines, § 15003(a).)

The EIR serves to provide public agencies and the public in general with information about the effect that a proposed project is likely to have on the environment and to “identify ways that environmental damage can be avoided or significantly reduced.” (CEQA Guidelines, § 15002, subd. (a)(2).) If the project has a significant effect on the environment, the agency may approve the project only upon finding that it has “eliminated or substantially lessened all significant effects on the environment where feasible” and that any unavoidable significant effects on the environment are “acceptable due to overriding concerns” specified in Public Resources Code section 21081. (See CEQA Guidelines, § 15092, subds. (b)(2)(A)-(B).)

While the courts review an EIR using an ‘abuse of discretion’ standard, the reviewing court is not to *uncritically* rely on every study or analysis presented by a project proponent in support of its position. (*Berkeley Jets*, 91 Cal.App.4th at p. 1355 (quoting *Laurel Heights Improvement Assn.*, 47 Cal.3d at pp. 391, 409 fn. 12) (internal quotations omitted).) A clearly inadequate or unsupported study is entitled to no judicial deference. (*Id.*) Drawing this line and determining whether the EIR complies with CEQA’s information disclosure requirements presents a question of law subject to independent review by the courts. (*Sierra Club v. County of Fresno* (2018) 6 Cal.5th 502, 515; *Madera Oversight Coalition, Inc. v. County of Madera* (2011) 199 Cal.App.4th 48, 102, 131.) As the court stated in *Berkeley Jets*, prejudicial abuse of discretion occurs if the failure to include relevant information precludes informed decision-making and informed public participation, thereby thwarting the statutory goals of the EIR process. (91 Cal.App.4th at p. 1355 (internal quotations omitted).)

The preparation and circulation of an EIR is more than a set of technical hurdles for agencies and developers to overcome. (*Communities for a Better Environment v. Richmond* (2010) 184 Cal.App.4th 70, 80 (quoting *Vineyard Area Citizens for Responsible Growth, Inc. v. City of Rancho Cordova* (2007) 40 Cal.4th 412, 449-450).) The EIR’s function is to

ensure that government officials who decide to build or approve a project do so with a full understanding of the environmental consequences and, equally important, that the public is assured those consequences have been considered. (*Id.*) For the EIR to serve these goals it must present information so that the foreseeable impacts of pursuing the project can be understood and weighed, and the public must be given an adequate opportunity to comment on that presentation before the decision to go forward is made. (*Id.*)

A public agency must prepare an EIR whenever substantial evidence supports a “fair argument” that a proposed project “may have a significant effect on the environment.” Pub. Res. Code, §§ 21100, 21151; CEQA Guidelines, §§ 15002, subds. (f)(1)-(2), 15063; *No Oil, Inc.*, 13 Cal.3d at p. 75; *Communities for a Better Environment v. California Resources Agency* (2002) 103 Cal.App.4th 98, 111-112. Essentially, should a lead agency be presented with a fair argument that a project may have a significant effect on the environment, the lead agency shall prepare an EIR even though it may also be presented with other substantial evidence that the project will not have a significant effect. CEQA Guidelines, §§ 15064, subds. (f)(1)-(2); see *No Oil Inc.*, *supra*, 13 Cal.3d at p. 75 (internal citations and quotations omitted). Substantial evidence includes “enough relevant information and reasonable inferences from this information that a fair argument can be made to support a conclusion, even though other conclusions might also be reached.” CEQA Guidelines, § 15384(a).

The fair argument standard is a “low threshold” test for requiring the preparation of an EIR. *No Oil Inc.*, *supra*, 13 Cal.3d at p. 84; *County Sanitation Dist. No. 2 of Los Angeles County v. County of Kern* (2005) 127 Cal.App.4th 1544, 1579. It “requires the preparation of an EIR where there is substantial evidence that any aspect of the project, either individually or cumulatively, may cause a significant effect on the environment, regardless of whether the overall effect of the project is adverse or beneficial[.]” *County Sanitation*, *supra*, 127 Cal.App.4th at p. 1580 (quoting CEQA Guidelines, § 15063(b)(1)).

Evidence supporting a fair argument of a significant environmental impact triggers preparation of an EIR regardless of whether the record contains contrary evidence. *League for Protection of Oakland’s Architectural and Historical Resources v. City of Oakland* (1997) 52 Cal.App.4th 896, 904-905. “Where the question is the sufficiency of the evidence to support a fair argument, deference to the agency’s determination is not appropriate[.]” *County Sanitation*, 127 Cal.App.4th at 1579 (quoting *Sierra Club v. County of Sonoma* (1992) 6 Cal.App.4th 1307, 1317-1318).

Further, it is the duty of the lead agency, not the public, to conduct the proper environmental studies. “The agency should not be allowed to hide behind its own failure to gather relevant data.” *Sundstrom*, 202 Cal.App.3d at p. 311. “Deficiencies in the record may actually enlarge the scope of fair argument by lending a logical plausibility to a wider range of inferences.” *Id.*; see also *Gentry v. City of Murrieta* (1995) 36 Cal.App.4th 1359, 1382 (lack of study enlarges the scope of the fair argument which may be made based on the limited facts in the record).

Thus, refusal to complete recommended studies lowers the already low threshold to establish a fair argument. The court may not exercise its independent judgment on the omitted material by determining whether the ultimate decision of the lead agency would have been affected had the law been followed. *Environmental Protection Information Center v. Cal. Dept. of Forestry* (2008) 44 Cal.4th 459, 486 (internal citations and quotations omitted). The remedy for this deficiency would be for the trial court to issue a writ of mandate. *Id.*

Both the review for failure to follow CEQA’s procedures and the fair argument test are questions of law, thus, the de novo standard of review applies. *Vineyard Area Citizens for Responsible Growth v. City of Rancho Cordova* (2007) 40 Cal.4th 412, 435. “Whether the agency’s record contains substantial evidence that would support a fair argument that the project may have a significant effect on the environment is treated as a question of law. *Consolidated Irrigation Dist.*, 204 Cal.App.4th at p. 207; Kostka and Zischke, *Practice Under the Environmental Quality Act* (2017, 2d ed.) at § 6.76.

In cases where it is not clear whether there is substantial evidence of significant environmental impacts, CEQA requires erring on the side of a “preference for resolving doubts in favor of environmental review.” *Mejia v. City of Los Angeles* (2005) 130 Cal.App.4th 322, 332. The foremost principle under CEQA is that the Legislature intended the act to be interpreted in such manner as to afford the fullest possible protection to the environment within the reasonable scope of the statutory language. *Friends of Mammoth v. Board of Supervisors* (1972) 8 Cal.3d 247, 259; CEQA Guidelines § 15003(f).

B. Reliance on an Addendum to the 2011 FEIR for the Specific Plan Is Improper as There Is a Fair Argument the Mill Creek Mixed Use Project May Have Significant Impacts Not Previously Addressed

For the original Thousand Oaks Boulevard SP project, the City had prepared and adopted a Final Environmental Impact Report (“FEIR”) in 2011. Now, 13 years later, the Project Applicant seeks to implement the Project at issue (e.g., a significant new project) with only an Addendum to the antiquated FEIR, rather than first pursuing separate and comprehensive environmental review of the Project.

However, it is settled that such an addendum is reviewed under the *fair argument* standard, similar to the FEIR it is an addendum to; accordingly, the case is reviewed *de novo*.

“An agency may prepare an addendum to a prior EIR to document its decision that a subsequent EIR is not required.” CEQA Guidelines § 15164(b), (e). However, an addendum is prepared only for “minor technical changes,” when changes to the EIR made by the addendum do not raise new issues; it is reviewed *with prior EIRs*. *Fund for Environmental Defense v. County of Orange* (1988) 204 Cal.App.3d 1538, 1553; CEQA Guidelines § 15164(a)-(b). “The addendum is the other side of the coin from the supplement to an EIR.” *Save Our Heritage Organization v. City of San Diego* (2018) 28 Cal.App.5th 656, 664-665. An addendum to a previously certified EIR is prepared only where “some changes or additions are necessary but none of the conditions described in Section 15162 calling for preparation of a subsequent EIR have occurred.” CEQA Guidelines § 15164(b).

Contrary to these established legal principles, the Project here is seeking to create a “loophole” to suggest that the CEQA review now must be based only on the changes proposed by the Project, regardless of whether certain impacts were or were not adequately studied in the prior FEIR on the SP. Stated differently, such an interpretation would yield to subversion of CEQA mandates, particularly in the context of a prior EIR to a Specific Plan, whereby any project applicant can seek approval of a specific smaller but still significant development project within the Specific Plan area by applying a less focused environmental study to it, such as the Addendum at issue, and by disposing of a separate EIR for such a project. Yet, courts “choose the construction that comports most closely with the apparent intent of the lawmakers, with a view to promoting rather than defeating the general purpose of the statute. *Ibid.*; *Torres v. Parkhouse Tire Service, Inc.* (2001) 26 Cal.4th 995, 1003, 111 Cal.Rptr.2d 564, 30 P.3d 57. Any interpretation that would lead to absurd

consequences is to be avoided. (*Ibid.*)” *Allen v. Sully-Miller Contracting Co.* (2002) 28 Cal.4th 222, 227. The intent of the lawmakers is embodied in CEQA Guidelines § 15003(f), whereby CEQA must be interpreted in a way to provide the fullest possible protection of the environment.

Moreover, an addendum is improper here since the Project is not just about a “minor” or technical change from the FEIR to the SP, but rather a significant physical addition of multiple acres of mixed-use urban development, with over 300 units of housing, on previously undeveloped land. The specific attributes and impacts of the proposed Project were not considered in the prior FEIR for the SP and are not minor or technical changes to warrant an addendum. Rather, the Project is a substantial revision or modification to the SP and implementation of it with an addendum is in violation of CEQA.

Lastly, an addendum is improper in this case in view of changes in the Project relative to the SP, and *new information* about new impacts or new feasible mitigation measures. CEQA Guidelines Section 15162 requires *subsequent* CEQA review – distinct and different from an *addendum* – if changes occur in the project, changes occur in the circumstances of the project, or new information that was not and could not have been known before is now known that suggests the Project may have more impacts or there are more feasible mitigation measures available than considered before. CEQA Guidelines Section 15162(a)(1)-(3). The Guidelines Section 15162 exceptions apply here, as detailed below.

In sum, an addendum is wholly inappropriate in this case and the Project must have adequate CEQA review to evaluate the Project as “the whole of an action” and its impacts. A *new* rather than a *subsequent* CEQA review should be ordered for the Project using a separate and independent environmental baseline for the specific Project site.

C. The Project Requires Preparation and Circulation of Its Own Supplemental EIR.

Section 15088.5(a) of the CEQA Guidelines provides that an EIR must be recirculated whenever there is disclosure of significant new information. Significant new information includes: (1) disclosure of a new significant environmental impact resulting from the project or from a new proposed mitigation measure; (2) disclosure of a substantial increase in the severity of an environmental impact unless mitigation measures are adopted that reduce the impact to a level of insignificance; and (3)

disclosure of a feasible project alternative or mitigation measure considerably different from others previously analyzed which would clearly lessen the significant environmental impacts of the project which the project proponents decline to adopt. (*Id.*)

Additionally, an EIR must be recirculated when it is so fundamentally inadequate and conclusory in nature that meaningful public review and comment is precluded. (*Id.* [citing *Mountain Lion Coalition v. Fish & Game Com.* (1989) 214 Cal.App.3d 1043].)

A lead agency must undertake supplemental CEQA review when substantial changes to a project or its circumstances require that lead agency to render new approvals that in turn require major revisions to a prior CEQA document due to new unstudied environmental impacts. (Pub. Res. Code §21166(a); CEQA Guidelines, §15162(a)(1); *Concerned Citizens of Costa Mesa v. 32nd Dist. Agricultural Association* (1986) 42 Cal.3d 929; *Fund for Environmental Defense v. County of Orange* (1988) 204 Cal.App.3d 1538. *Cf., Benton v. Board of Supervisors* (1991) 226 Cal.App.3d 1467, *Eller Media Company v. Community Redevelopment Agency* (2003) 108 Cal.App.4th 25.)

New information triggers a supplemental EIR to inform an agency's new discretionary project approval if it (1) was not known and could not have been known at the time the initial EIR was certified as complete for an original project, (2) the information shows new or substantially more severe significant impacts, or demonstrates the feasibility of important mitigation measures or alternatives previously found infeasible, or discloses important new mitigation measures or alternatives, and (3) the new information is of substantial importance to the project. §21166(c); Guidelines, §15162(a)(3).

Section 15164 of the CEQA guidelines provides: "The lead agency or a responsible agency shall prepare an addendum to a previously certified EIR if some changes or additions are necessary but none of the conditions described in Section 15162 calling for preparation of a subsequent EIR have occurred." (*Id.* subd. (a).) "When there are changes in a project after the certification of a Final Report, the agency can prepare an Addendum to the Report if the changes do not substantially modify the analysis in the original Report. The Addendum is acceptable, rather than a new or Supplemental EIR, when there are ***only minor technical changes or additions which do not raise important new issues about the significant effects on the environment.***" (*Ventura Foothill Neighbors v. County of Ventura* (2014) 232 Cal.App.4th 429, 435(citing 9

Miller & Starr, Cal. Real Estate (3d ed.2011), § 25A:19, p. 25A–107, fns. omitted; emphasis added.))

1. The Project Conflicts with Various Aspects of the Thousand Oaks Boulevard Specific Plan.

Here, the Project reflects substantial changes from the SP, such that the City’s provision of the Addendum is not CEQA-compliant. For example, here, the Project contemplates constructing three mixed-used buildings: one that will be four (4) stories in height and two that will be five (5) stories in height. Meanwhile, the SP provides a Special Standard for Thousand Oaks Boulevard Street Frontage projects that “[t]he maximum average building height is 50 feet, **not to exceed 3 stories.**” (See SP at pp. 60-64; emphasis added.) Additionally, the Project contemplates that 18% of frontage along Thousand Oaks Boulevard will be retail, when the SP requires any building with greater than 100 feet of frontage along Thousand Oaks Boulevard to maintain a minimum of 50% retail frontage area. (See SP at p. 65.) In these regards, the Project as proposed directly conflicts with the parameters of the SP, in that the structures being contemplated by the Project exceed the building size permitted by the SP and do not satisfy the SP’s retail frontage requirements.

Where the lead agency of a project fails to analyze “[s]ubstantial changes’ in the project, requiring ‘major revisions’ in the EIR,” courts find that such agencies have abused their discretion by failing to prepare a supplemental EIR. (*Ventura Foothill Neighbors, supra*, (2014) 232 Cal.App.4th at 436 (citing *Committee For Green Foothills v. Santa Clara County Bd. of Supervisors* (2010) 48 Cal.4th 32, 54).) Meanwhile, the City’s April 22, 2024, Response to Comments fails to address these specific concerns regarding the Project’s lack of compliance with the SP, and the attendant lack of analysis of the environmental impacts associated with the conflicts of the Project with of the existing land use plans for the Project site. (See April 22, 2024, Response to Comments from Mitchell M. Tsai Law Firm, prepared by Tony Locacciatto of Meridian Consultants, attached to Staff Report (“April 22, 2024, Response to Comments”).)

Irrespective of whether the Project has sought various concessions from the City for aspects of the Project that conflict with the SP, the City cannot credibly contend that the Project fits neatly within the SP’s scope and results in no “substantial changes” to the Project relative to those contemplated in the FEIR for the SP. Further analysis of the Project, by way of a supplemental EIR, is required in this instance.

2. The Project's Assessment of Impacts to Biological Resources is Outdated and Inadequate.

In addition to the Project's conflict with the SP, the biological survey conducted in connection with the Addendum is inadequate for CEQA purposes. The FEIR's biological mitigation measures were developed in 2011 based on site surveys taken at that time. Thus, the biological surveys on which the FEIR's mitigation measures are premised were conducted approximately 13 years ago and are now consummately outdated. The validity of those prior mitigation measures cannot be justified via a 5-hour nesting bird survey performed on a single day, as the City has attempted here. (See Appendix K to Addendum.) Moreover, the City's April 22, 2024, Response to Comments fails to address these specific concerns regarding the inadequacy of the surveys conducted pursuant to the Addendum and the current inadequacy of biological impact mitigation measures in the SP EIR that were developed based on antiquated biological survey information. (See April 22, 2024 Response to Comments.) Instead, the site must be reevaluated for the presence of other potential special-status species, such that the efficacy of the prior mitigation measures can be analyzed.

Additionally, the Project contemplates removal of 33 trees, 22 of which are protected oak trees. The FEIR for the SP provides no indication that it contemplated removal of this quantity of protected oaks, and the proposed removal is well in excess of the City's Oak Tree Preservation and Protection Standards and Guidelines.

Moreover, the Addendum provides only conclusory analysis as justification for the oak removals being contemplated. Notably, the December 6, 2023, recommendations and inquiries that the City received from landscape architect and registered consulting arborist, John Burke (LA JOHNNY), do not appear to have been acted upon, or otherwise incorporated in the Addendum. (See Exhibit D.) Among the various concerns raised regarding the impact of the Project on existing oak trees on the Project site, Mr. Burke specifically notes that specific justification must be provided for the removal of each oak tree anticipated to be removed, as well as explanation for why eight young oaks on the Project Site cannot be boxed and replanted. (*Id.*) Meanwhile, the purported expert consultant Arborist Report included as Appendix C to the Addendum (finalized after the December 6, 2023, comments/recommendations from Mr. Burke) provides only generic conclusory statements on both issues. (See Appendix C to Addendum at pp. 17, 19.) Specifically,

Appendix C (1) indicates only generally that “[m]uch of the site will need to be graded to accommodate the construction...” such that the majority of the oaks will need to be removed, without providing any analysis of how or why the Project will in fact require removal of 33 trees, and (2) provides only a summary of the general factors to be considered in connection with tree relocation, and then summarily concludes without any analysis whatsoever that none of the trees at the Project site would be suitable candidates for relocation. (*Id.*)

Worse still, after the Arborist Report in Appendix C was further revised prior to public circulation of the Addendum, it appears the City instructed Mr. Burke **“ignore” his further review** of the updated draft to determine if his previous comments and recommendations had been addressed. (See Exhibit E.)

In response to WSRCC’s prior comments regarding the biological impacts of the extensive oak tree removals being contemplated by the Project, the City states only generally that the SP EIR noted that oak trees may be impacted by development in the SP area and that the impacts could be significant. (See April 22, 2024, Response to Comments.) The City follows those remarks by asserting that the EIR for the SP accounted for the impacts to oak trees in the SP area by adopting a mitigation measure in the form of required compliance with the City’s Oak Tree Preservation and Protection Ordinance (“Oak Tree Ordinance”).

The City’s April 22, 2024 response on the oak tree issue misses the mark, in that the 2011 EIR for the SP did not consider and analyze the specific impacts presented by the scope of removals to occur at the Project site now at issue, or ascertain how best to mitigate those specific impacts, beyond compliance with the City Oak Tree Ordinance. Further, it is well-established that, to meet CEQA requirements, a determination that regulatory compliance is sufficient to prevent significant adverse impacts must be based on a project-specific analysis of potential impacts and the effect of regulatory compliance. See *Californians for Alternatives to Toxics v. Department of Food & Agric.* (2005) 136 Cal. App. 4th 1; *Ebbetts Pass Forest Watch v Department of Forestry & Fire Protection* (2008) 43 Cal. App. 4th 936, 956. Here, the Addendum falls well short of providing adequate analysis of the impact mitigation that the Oak Tree Ordinance would offer against what are otherwise substantial impacts to biological resources, and thereby violates CEQA.

The foregoing impacts to biological resources are significant, were not contemplated, considered, or analyzed by the 13-year-old FEIR, and constitute “substantial changes”

to the SP project. Accordingly, the Project presents substantial new information regarding its environmental impacts, such that the Project warrants preparation of its own supplemental EIR.

IV. CONCLUSION

Western Carpenters submits that the City is required by CEQA to circulate a separate DEIR for the Project to address the aforementioned concerns. Absent doing so, any approval of this Project under the prior 2011 FEIR certified for the SP would violate CEQA and subvert the public environmental review process. If the City has any questions or concerns regarding the foregoing, please do not hesitate to contact this office.

Sincerely,

Jeremy H. Herwitt

Subject: Local Hire Requirements and Considerations for Greenhouse Gas Modeling

Dear Mr. Tsai,

Soil Water Air Protection Enterprise ("SWAPE") is pleased to provide the following draft technical report explaining the significance of worker trips required for construction of land use development projects with respect to the estimation of greenhouse gas ("GHG") emissions. The report will also discuss the potential for local hire requirements to reduce the length of worker trips, and consequently, reduced or mitigate the potential GHG impacts.

Worker Trips and Greenhouse Gas Calculations

The California Emissions Estimator Model ("CalEEMod") is a "statewide land use emissions computer model designed to provide a uniform platform for government agencies, land use planners, and environmental professionals to quantify potential criteria pollutant and greenhouse gas (GHG) emissions associated with both construction and operations from a variety of land use projects."¹ CalEEMod quantifies construction-related emissions associated with land use projects resulting from off-road construction equipment; on-road mobile equipment associated with workers, vendors, and hauling; fugitive dust associated with grading, demolition, truck loading, and on-road vehicles traveling along paved and unpaved roads; and architectural coating activities; and paving.²

The number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.³

² "California Emissions Estimator Model." CAPCOA, 2017, available at: <http://www.aqmd.gov/caleemod/home>.

³ "CalEEMod User's Guide." CAPCOA, November 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

Specifically, the number and length of vehicle trips is utilized to estimate the vehicle miles travelled (“VMT”) associated with construction. Then, utilizing vehicle-class specific EMFAC 2014 emission factors, CalEEMod calculates the vehicle exhaust, evaporative, and dust emissions resulting from construction-related VMT, including personal vehicles for worker commuting.⁴

Specifically, in order to calculate VMT, CalEEMod multiplies the average daily trip rate by the average overall trip length (see excerpt below):

$$\text{“VMT}_d = \Sigma(\text{Average Daily Trip Rate}_i * \text{Average Overall Trip Length}_i) _n$$

Where:

n = Number of land uses being modeled.”⁵

Furthermore, to calculate the on-road emissions associated with worker trips, CalEEMod utilizes the following equation (see excerpt below):

$$\text{“Emissions}_{\text{pollutant}} = \text{VMT} * \text{EF}_{\text{running,pollutant}}$$

Where:

$\text{Emissions}_{\text{pollutant}}$ = emissions from vehicle running for each pollutant

VMT = vehicle miles traveled

$\text{EF}_{\text{running,pollutant}}$ = emission factor for running emissions.”⁶

Thus, there is a direct relationship between trip length and VMT, as well as a direct relationship between VMT and vehicle running emissions. In other words, when the trip length is increased, the VMT and vehicle running emissions increase as a result. Thus, vehicle running emissions can be reduced by decreasing the average overall trip length, by way of a local hire requirement or otherwise.

Default Worker Trip Parameters and Potential Local Hire Requirements

As previously discussed, the number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.⁷ In order to understand how local hire requirements and associated worker trip length reductions impact GHG emissions calculations, it is important to consider the CalEEMod default worker trip parameters. CalEEMod provides recommended default values based on site-specific information, such as land use type, meteorological data, total lot acreage, project type and typical equipment associated with project type. If more specific project information is known, the user can change the default values and input project-specific values, but the California Environmental Quality Act (“CEQA”) requires that such changes be justified by substantial evidence.⁸ The default number of construction-related worker trips is calculated by multiplying the

⁸ CalEEMod User Guide, available at: <http://www.caleemod.com/>, p. 1, 9.

number of pieces of equipment for all phases by 1.25, with the exception of worker trips required for the building construction and architectural coating phases.⁹ Furthermore, the worker trip vehicle class is a 50/25/25 percent mix of light duty autos, light duty truck class 1 and light duty truck class 2, respectively.”¹⁰ Finally, the default worker trip length is consistent with the length of the operational home-to-work vehicle trips.¹¹ The operational home-to-work vehicle trip lengths are:

“[B]ased on the location and urbanization selected on the project characteristic screen. These values were supplied by the air districts or use a default average for the state. Each district (or county) also assigns trip lengths for urban and rural settings” (emphasis added).¹²

Thus, the default worker trip length is based on the location and urbanization level selected by the User when modeling emissions. The below table shows the CalEEMod default rural and urban worker trip lengths by air basin (see excerpt below and Attachment A).¹³

Worker Trip Length by Air Basin		
Air Basin	Rural (miles)	Urban (miles)
Great Basin Valleys	16.8	10.8
Lake County	16.8	10.8
Lake Tahoe	16.8	10.8

¹³ “Appendix D Default Data Tables.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4, p. D-84 – D-86.

As demonstrated above, default rural worker trip lengths for air basins in California vary from 10.8- to 19.8- miles, with an average of 16.47 miles. Furthermore, default urban worker trip lengths vary from 10.8- to 14.7- miles, with an average of 11.17 miles. Thus, while default worker trip lengths vary by location, default urban worker trip lengths tend to be shorter in length. Based on these trends evident in the CalEEMod default worker trip lengths, we can reasonably assume that the efficacy of a local hire requirement is especially dependent upon the urbanization of the project site, as well as the project location.

Practical Application of a Local Hire Requirement and Associated Impact

To provide an example of the potential impact of a local hire provision on construction-related GHG emissions, we estimated the significance of a local hire provision for the Village South Specific Plan (“Project”) located in the City of Claremont (“City”). The Project proposed to construct 1,000 residential units, 100,000-SF of retail space, 45,000-SF of office space, as well as a 50-room hotel, on the 24-acre site. The Project location is classified as Urban and lies within the Los Angeles-South Coast County. As a result, the Project has a default worker trip length of 14.7 miles.¹⁴ In an effort to evaluate the potential for a local hire provision to reduce the Project’s construction-related GHG emissions, we prepared an updated model, reducing all worker trip lengths to 10 miles (see Attachment B). Our analysis estimates that if a local hire provision with a 10-mile radius were to be implemented, the GHG emissions associated with Project construction would decrease by approximately 17% (see table below and Attachment C).

Local Hire Provision Net Change	
Without Local Hire Provision	
Total Construction GHG Emissions (MT CO ₂ e)	3,623
Amortized Construction GHG Emissions (MT CO ₂ e/year)	120.77
With Local Hire Provision	
Total Construction GHG Emissions (MT CO ₂ e)	3,024
Amortized Construction GHG Emissions (MT CO ₂ e/year)	100.80
% Decrease in Construction-related GHG Emissions	17%

As demonstrated above, by implementing a local hire provision requiring 10 mile worker trip lengths, the Project could reduce potential GHG emissions associated with construction worker trips. More broadly, any local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

This serves as an example of the potential impacts of local hire requirements on estimated project-level GHG emissions, though it does not indicate that local hire requirements would result in reduced construction-related GHG emission for all projects. As previously described, the significance of a local hire requirement depends on the worker trip length enforced and the default worker trip length for the project’s urbanization level and location.

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	45.00	1000sqft	1.03	45,000.00	0
High Turnover (Sit Down Restaurant)	36.00	1000sqft	0.83	36,000.00	0
Hotel	50.00	Room	1.67	72,600.00	0
Quality Restaurant	8.00	1000sqft	0.18	8,000.00	0
Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	CH4 Intensity (lb/MWhr)	0.029	N2O Intensity (lb/MWhr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	45.00	1000sqft	1.03	45,000.00	0
High Turnover (Sit Down Restaurant)	36.00	1000sqft	0.83	36,000.00	0
Hotel	50.00	Room	1.67	72,600.00	0
Quality Restaurant	8.00	1000sqft	0.18	8,000.00	0
Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

% Decrease in Construction-related GHG Emissions	17%

EXHIBIT B

Paul Rosenfeld, Ph.D.

Principal Environmental Chemist

Chemical Fate and Transport & Air Dispersion Modeling

Risk Assessment & Remediation Specialist

Education

Ph.D. Soil Chemistry, University of Washington, 1999. Dissertation on volatile organic compound filtration.

M.S. Environmental Science, U.C. Berkeley, 1995. Thesis on organic waste economics.

B.A. Environmental Studies, U.C. Santa Barbara, 1991. Thesis on wastewater treatment.

Professional Experience

Dr. Rosenfeld has over 25 years' experience conducting environmental investigations and risk assessments for evaluating impacts to human health, property, and ecological receptors. His expertise focuses on the fate and transport of environmental contaminants, human health risk, exposure assessment, and ecological restoration. Dr. Rosenfeld has evaluated and modeled emissions from unconventional oil drilling operations, oil spills, landfills, boilers and incinerators, process stacks, storage tanks, confined animal feeding operations, and many other industrial and agricultural sources. His project experience ranges from monitoring and modeling of pollution sources to evaluating impacts of pollution on workers at industrial facilities and residents in surrounding communities.

Dr. Rosenfeld has investigated and designed remediation programs and risk assessments for contaminated sites containing lead, heavy metals, mold, bacteria, particulate matter, petroleum hydrocarbons, chlorinated solvents, pesticides, radioactive waste, dioxins and furans, semi- and volatile organic compounds, PCBs, PAHs, perchlorate, asbestos, per- and poly-fluoroalkyl substances (PFOA/PFOS), unusual polymers, fuel oxygenates (MTBE), among other pollutants. Dr. Rosenfeld also has experience evaluating greenhouse gas emissions from various projects and is an expert on the assessment of odors from industrial and agricultural sites, as well as the evaluation of odor nuisance impacts and technologies for abatement of odorous emissions. As a principal scientist at SWAPE, Dr. Rosenfeld directs air dispersion modeling and exposure assessments. He has served as an expert witness and testified about pollution sources causing nuisance and/or personal injury at dozens of sites and has testified as an expert witness on more than ten cases involving exposure to air contaminants from industrial sources.

Professional History:

Soil Water Air Protection Enterprise (SWAPE); 2003 to present; Principal and Founding Partner
UCLA School of Public Health; 2007 to 2011; Lecturer (Assistant Researcher)
UCLA School of Public Health; 2003 to 2006; Adjunct Professor
UCLA Environmental Science and Engineering Program; 2002-2004; Doctoral Intern Coordinator
UCLA Institute of the Environment, 2001-2002; Research Associate
Komex H₂O Science, 2001 to 2003; Senior Remediation Scientist
National Groundwater Association, 2002-2004; Lecturer
San Diego State University, 1999-2001; Adjunct Professor
Anteon Corp., San Diego, 2000-2001; Remediation Project Manager
Ogden (now Amec), San Diego, 2000-2000; Remediation Project Manager
Bechtel, San Diego, California, 1999 – 2000; Risk Assessor
King County, Seattle, 1996 – 1999; Scientist
James River Corp., Washington, 1995-96; Scientist
Big Creek Lumber, Davenport, California, 1995; Scientist
Plumas Corp., California and USFS, Tahoe 1993-1995; Scientist
Peace Corps and World Wildlife Fund, St. Kitts, West Indies, 1991-1993; Scientist

Presentations:

Rosenfeld, P.E., Sutherland, A; Hesse, R.; Zapata, A. (October 3-6, 2013). Air dispersion modeling of volatile organic emissions from multiple natural gas wells in Decatur, TX. *44th Western Regional Meeting, American Chemical Society*. Lecture conducted from Santa Clara, CA.

Sok, H.L.; Waller, C.C.; Feng, L.; Gonzalez, J.; Sutherland, A.J.; Wisdom-Stack, T.; Sahai, R.K.; Hesse, R.C.; **Rosenfeld, P.E.** (June 20-23, 2010). Atrazine: A Persistent Pesticide in Urban Drinking Water. *Urban Environmental Pollution*. Lecture conducted from Boston, MA.

Feng, L.; Gonzalez, J.; Sok, H.L.; Sutherland, A.J.; Waller, C.C.; Wisdom-Stack, T.; Sahai, R.K.; La, M.; Hesse, R.C.; **Rosenfeld, P.E.** (June 20-23, 2010). Bringing Environmental Justice to East St. Louis, Illinois. *Urban Environmental Pollution*. Lecture conducted from Boston, MA.

Rosenfeld, P.E. (April 19-23, 2009). Perfluorooctanoic Acid (PFOA) and Perfluorooctane Sulfonate (PFOS) Contamination in Drinking Water From the Use of Aqueous Film Forming Foams (AFFF) at Airports in the United States. *2009 Ground Water Summit and 2009 Ground Water Protection Council Spring Meeting*, Lecture conducted from Tuscon, AZ.

Rosenfeld, P.E. (April 19-23, 2009). Cost to Filter Atrazine Contamination from Drinking Water in the United States” Contamination in Drinking Water From the Use of Aqueous Film Forming Foams (AFFF) at Airports in the United States. *2009 Ground Water Summit and 2009 Ground Water Protection Council Spring Meeting*. Lecture conducted from Tuscon, AZ.

Wu, C., Tam, L., Clark, J., **Rosenfeld, P.** (20-22 July, 2009). Dioxin and furan blood lipid concentrations in populations living near four wood treatment facilities in the United States. Brebbia, C.A. and Popov, V., eds., *Air Pollution XVII: Proceedings of the Seventeenth International Conference on Modeling, Monitoring and Management of Air Pollution*. Lecture conducted from Tallinn, Estonia.

Rosenfeld, P. E. (October 15-18, 2007). Moss Point Community Exposure To Contaminants From A Releasing Facility. *The 23rd Annual International Conferences on Soils Sediment and Water*. Platform lecture conducted from University of Massachusetts, Amherst MA.

Rosenfeld, P. E. (October 15-18, 2007). The Repeated Trespass of Tritium-Contaminated Water Into A Surrounding Community Form Repeated Waste Spills From A Nuclear Power Plant. *The 23rd Annual International Conferences on Soils Sediment and Water*. Platform lecture conducted from University of Massachusetts, Amherst MA.

Rosenfeld, P. E. (October 15-18, 2007). Somerville Community Exposure To Contaminants From Wood Treatment Facility Emissions. The 23rd Annual International Conferences on Soils Sediment and Water. Lecture conducted from University of Massachusetts, Amherst MA.

Rosenfeld P. E. (March 2007). Production, Chemical Properties, Toxicology, & Treatment Case Studies of 1,2,3-Trichloropropane (TCP). *The Association for Environmental Health and Sciences (AEHS) Annual Meeting*. Lecture conducted from San Diego, CA.

Rosenfeld P. E. (March 2007). Blood and Attic Sampling for Dioxin/Furan, PAH, and Metal Exposure in Florala, Alabama. *The AEHS Annual Meeting*. Lecture conducted from San Diego, CA.

Hensley A.R., Scott, A., **Rosenfeld P.E.**, Clark, J.J.J. (August 21 – 25, 2006). Dioxin Containing Attic Dust And Human Blood Samples Collected Near A Former Wood Treatment Facility. *The 26th International Symposium on Halogenated Persistent Organic Pollutants – DIOXIN2006*. Lecture conducted from Radisson SAS Scandinavia Hotel in Oslo Norway.

Hensley A.R., Scott, A., **Rosenfeld P.E.**, Clark, J.J.J. (November 4-8, 2006). Dioxin Containing Attic Dust And Human Blood Samples Collected Near A Former Wood Treatment Facility. *APHA 134 Annual Meeting & Exposition*. Lecture conducted from Boston Massachusetts.

Paul Rosenfeld Ph.D. (October 24-25, 2005). Fate, Transport and Persistence of PFOA and Related Chemicals. Mealey's C8/PFOA. *Science, Risk & Litigation Conference*. Lecture conducted from The Rittenhouse Hotel, Philadelphia, PA.

Paul Rosenfeld Ph.D. (September 19, 2005). Brominated Flame Retardants in Groundwater: Pathways to Human Ingestion, *Toxicology and Remediation PEMA Emerging Contaminant Conference*. Lecture conducted from Hilton Hotel, Irvine California.

Paul Rosenfeld Ph.D. (September 19, 2005). Fate, Transport, Toxicity, And Persistence of 1,2,3-TCP. *PEMA Emerging Contaminant Conference*. Lecture conducted from Hilton Hotel in Irvine, California.

Paul Rosenfeld Ph.D. (September 26-27, 2005). Fate, Transport and Persistence of PDBEs. *Mealey's Groundwater Conference*. Lecture conducted from Ritz Carlton Hotel, Marina Del Ray, California.

Paul Rosenfeld Ph.D. (June 7-8, 2005). Fate, Transport and Persistence of PFOA and Related Chemicals. *International Society of Environmental Forensics: Focus On Emerging Contaminants*. Lecture conducted from Sheraton Oceanfront Hotel, Virginia Beach, Virginia.

Paul Rosenfeld Ph.D. (July 21-22, 2005). Fate Transport, Persistence and Toxicology of PFOA and Related Perfluorochemicals. *2005 National Groundwater Association Ground Water And Environmental Law Conference*. Lecture conducted from Wyndham Baltimore Inner Harbor, Baltimore Maryland.

Paul Rosenfeld Ph.D. (July 21-22, 2005). Brominated Flame Retardants in Groundwater: Pathways to Human Ingestion, Toxicology and Remediation. *2005 National Groundwater Association Ground Water and Environmental Law Conference*. Lecture conducted from Wyndham Baltimore Inner Harbor, Baltimore Maryland.

Paul Rosenfeld, Ph.D. and James Clark Ph.D. and Rob Hesse R.G. (May 5-6, 2004). Tert-butyl Alcohol Liability and Toxicology, A National Problem and Unquantified Liability. *National Groundwater Association. Environmental Law Conference*. Lecture conducted from Congress Plaza Hotel, Chicago Illinois.

Paul Rosenfeld, Ph.D. (March 2004). Perchlorate Toxicology. *Meeting of the American Groundwater Trust*. Lecture conducted from Phoenix Arizona.

Hagemann, M.F., **Paul Rosenfeld, Ph.D.** and Rob Hesse (2004). Perchlorate Contamination of the Colorado River. *Meeting of tribal representatives*. Lecture conducted from Parker, AZ.

Paul Rosenfeld, Ph.D. (April 7, 2004). A National Damage Assessment Model For PCE and Dry Cleaners. *Drycleaner Symposium. California Ground Water Association*. Lecture conducted from Radison Hotel, Sacramento, California.

Rosenfeld, P. E., Grey, M., (June 2003) Two stage biofilter for biosolids composting odor control. *Seventh International In Situ And On Site Bioremediation Symposium Battelle Conference* Orlando, FL.

Paul Rosenfeld, Ph.D. and James Clark Ph.D. (February 20-21, 2003) Understanding Historical Use, Chemical Properties, Toxicity and Regulatory Guidance of 1,4 Dioxane. *National Groundwater Association. Southwest Focus Conference. Water Supply and Emerging Contaminants..* Lecture conducted from Hyatt Regency Phoenix Arizona.

Paul Rosenfeld, Ph.D. (February 6-7, 2003). Underground Storage Tank Litigation and Remediation. *California CUPA Forum*. Lecture conducted from Marriott Hotel, Anaheim California.

Paul Rosenfeld, Ph.D. (October 23, 2002) Underground Storage Tank Litigation and Remediation. *EPA Underground Storage Tank Roundtable*. Lecture conducted from Sacramento California.

Rosenfeld, P.E. and Suffet, M. (October 7- 10, 2002). Understanding Odor from Compost, *Wastewater and Industrial Processes. Sixth Annual Symposium On Off Flavors in the Aquatic Environment. International Water Association*. Lecture conducted from Barcelona Spain.

Rosenfeld, P.E. and Suffet, M. (October 7- 10, 2002). Using High Carbon Wood Ash to Control Compost Odor. *Sixth Annual Symposium On Off Flavors in the Aquatic Environment. International Water Association*. Lecture conducted from Barcelona Spain.

Rosenfeld, P.E., C.L. Henry. (1998). Characterization, Quantification, and Control of Odor Emissions from Biosolids Application To Forest Soil. *Biofest*. Lecture conducted from Lake Chelan, Washington.

Rosenfeld, P.E., C.L. Henry, R. Harrison. (1998). Oat and Grass Seed Germination and Nitrogen and Sulfur Emissions Following Biosolids Incorporation With High-Carbon Wood-Ash. Water Environment Federation 12th Annual Residuals and Biosolids Management Conference Proceedings. Lecture conducted from Bellevue Washington.

Rosenfeld, P.E., C.L. Henry, R. B. Harrison, and R. Dills. (1997). Comparison of Odor Emissions From Three Different Biosolids Applied to Forest Soil. *Soil Science Society of America*. Lecture conducted from Anaheim California.

Teaching Experience:

UCLA Department of Environmental Health (Summer 2003 through 20010) Taught Environmental Health Science 100 to students, including undergrad, medical doctors, public health professionals and nurses. Course focused on the health effects of environmental contaminants.

National Ground Water Association, Successful Remediation Technologies. Custom Course in Sante Fe, New Mexico. May 21, 2002. Focused on fate and transport of fuel contaminants associated with underground storage tanks.

National Ground Water Association; Successful Remediation Technologies Course in Chicago Illinois. April 1, 2002. Focused on fate and transport of contaminants associated with Superfund and RCRA sites.

California Integrated Waste Management Board, April and May, 2001. Alternative Landfill Caps Seminar in San Diego, Ventura, and San Francisco. Focused on both prescriptive and innovative landfill cover design.

UCLA Department of Environmental Engineering, February 5, 2002. Seminar on Successful Remediation Technologies focusing on Groundwater Remediation.

University Of Washington, Soil Science Program, Teaching Assistant for several courses including: Soil Chemistry, Organic Soil Amendments, and Soil Stability.

U.C. Berkeley, Environmental Science Program Teaching Assistant for Environmental Science 10.

Academic Grants Awarded:

California Integrated Waste Management Board. \$41,000 grant awarded to UCLA Institute of the Environment. Goal: To investigate effect of high carbon wood ash on volatile organic emissions from compost. 2001.

Synagro Technologies, Corona California: \$10,000 grant awarded to San Diego State University. Goal: investigate effect of biosolids for restoration and remediation of degraded coastal sage soils. 2000.

King County, Department of Research and Technology, Washington State. \$100,000 grant awarded to University of Washington: Goal: To investigate odor emissions from biosolids application and the effect of polymers and ash on VOC emissions. 1998.

Northwest Biosolids Management Association, Washington State. \$20,000 grant awarded to investigate effect of polymers and ash on VOC emissions from biosolids. 1997.

James River Corporation, Oregon: \$10,000 grant was awarded to investigate the success of genetically engineered Poplar trees with resistance to round-up. 1996.

United State Forest Service, Tahoe National Forest: \$15,000 grant was awarded to investigating fire ecology of the Tahoe National Forest. 1995.

Kellogg Foundation, Washington D.C. \$500 grant was awarded to construct a large anaerobic digester on St. Kitts in West Indies. 1993

Deposition and/or Trial Testimony:

In the United States District Court For The District of New Jersey

Duarte et al, *Plaintiffs*, vs. United States Metals Refining Company et. al. *Defendant*.

Case No.: 2:17-cv-01624-ES-SCM

Rosenfeld Deposition. 6-7-2019

In the United States District Court of Southern District of Texas Galveston Division

M/T Carla Maersk, *Plaintiffs*, vs. Conti 168., Schiffahrts-GMBH & Co. Bulker KG MS “Conti Perdido”
Defendant.

Case No.: 3:15-CV-00106 consolidated with 3:15-CV-00237

Rosenfeld Deposition. 5-9-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica

Carole-Taddeo-Bates et al., vs. Ifran Khan et al., Defendants

Case No.: No. BC615636

Rosenfeld Deposition, 1-26-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica

The San Gabriel Valley Council of Governments et al. vs El Adobe Apts. Inc. et al., Defendants

Case No.: No. BC646857

Rosenfeld Deposition, 10-6-2018; Trial 3-7-19

In United States District Court For The District of Colorado

Bells et al. Plaintiff vs. The 3M Company et al., Defendants

Case: No 1:16-cv-02531-RBJ

Rosenfeld Deposition, 3-15-2018 and 4-3-2018

In The District Court Of Regan County, Texas, 112th Judicial District

Phillip Bales et al., Plaintiff vs. Dow Agrosiences, LLC, et al., Defendants

Cause No 1923

Rosenfeld Deposition, 11-17-2017

In The Superior Court of the State of California In And For The County Of Contra Costa

Simons et al., Plaintiffs vs. Chevron Corporation, et al., Defendants

Cause No C12-01481

Rosenfeld Deposition, 11-20-2017

In The Circuit Court Of The Twentieth Judicial Circuit, St Clair County, Illinois

Martha Custer et al., Plaintiff vs. Cerro Flow Products, Inc., Defendants

Case No.: No. 0i9-L-2295

Rosenfeld Deposition, 8-23-2017

In The Superior Court of the State of California, For The County of Los Angeles

Warrn Gilbert and Penny Gilber, Plaintiff vs. BMW of North America LLC

Case No.: LC102019 (c/w BC582154)

Rosenfeld Deposition, 8-16-2017, Trail 8-28-2018

In the Northern District Court of Mississippi, Greenville Division

Brenda J. Cooper, et al., *Plaintiffs*, vs. Meritor Inc., et al., *Defendants*

Case Number: 4:16-cv-52-DMB-JVM

Rosenfeld Deposition: July 2017

In The Superior Court of the State of Washington, County of Snohomish
Michael Davis and Julie Davis et al., Plaintiff vs. Cedar Grove Composting Inc., Defendants
Case No.: No. 13-2-03987-5
Rosenfeld Deposition, February 2017
Trial, March 2017

In The Superior Court of the State of California, County of Alameda
Charles Spain., Plaintiff vs. Thermo Fisher Scientific, et al., Defendants
Case No.: RG14711115
Rosenfeld Deposition, September 2015

In The Iowa District Court In And For Poweshiek County
Russell D. Winburn, et al., Plaintiffs vs. Doug Hoksbergen, et al., Defendants
Case No.: LALA002187
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Jerry Dovico, et al., Plaintiffs vs. Valley View Sine LLC, et al., Defendants
Law No.: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Doug Pauls, et al., et al., Plaintiffs vs. Richard Warren, et al., Defendants
Law No.: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Circuit Court of Ohio County, West Virginia
Robert Andrews, et al. v. Antero, et al.
Civil Action NO. 14-C-30000
Rosenfeld Deposition, June 2015

In The Third Judicial District County of Dona Ana, New Mexico
Betty Gonzalez, et al. Plaintiffs vs. Del Oro Dairy, Del Oro Real Estate LLC, Jerry Settles and Deward
DeRuyter, Defendants
Rosenfeld Deposition: July 2015

In The Iowa District Court For Muscatine County
Laurie Freeman et. al. Plaintiffs vs. Grain Processing Corporation, Defendant
Case No 4980
Rosenfeld Deposition: May 2015

In the Circuit Court of the 17th Judicial Circuit, in and For Broward County, Florida
Walter Hinton, et. al. Plaintiff, vs. City of Fort Lauderdale, Florida, a Municipality, Defendant.
Case Number CACE07030358 (26)
Rosenfeld Deposition: December 2014

In the United States District Court Western District of Oklahoma
Tommy McCarty, et al., Plaintiffs, v. Oklahoma City Landfill, LLC d/b/a Southeast Oklahoma City
Landfill, et al. Defendants.
Case No. 5:12-cv-01152-C
Rosenfeld Deposition: July 2014

In the County Court of Dallas County Texas

Lisa Parr et al, *Plaintiff*, vs. Aruba et al, *Defendant*.

Case Number cc-11-01650-E

Rosenfeld Deposition: March and September 2013

Rosenfeld Trial: April 2014

In the Court of Common Pleas of Tuscarawas County Ohio

John Michael Abicht, et al., *Plaintiffs*, vs. Republic Services, Inc., et al., *Defendants*

Case Number: 2008 CT 10 0741 (Cons. w/ 2009 CV 10 0987)

Rosenfeld Deposition: October 2012

In the United States District Court of Southern District of Texas Galveston Division

Kyle Cannon, Eugene Donovan, Genaro Ramirez, Carol Sassler, and Harvey Walton, each Individually and on behalf of those similarly situated, *Plaintiffs*, vs. BP Products North America, Inc., *Defendant*.

Case 3:10-cv-00622

Rosenfeld Deposition: February 2012

Rosenfeld Trial: April 2013

In the Circuit Court of Baltimore County Maryland

Philip E. Cvach, II et al., *Plaintiffs* vs. Two Farms, Inc. d/b/a Royal Farms, Defendants

Case Number: 03-C-12-012487 OT

Rosenfeld Deposition: September 2013

Matthew F. Hagemann, P.G., C.Hg., QSD, QSP

**Geologic and Hydrogeologic Characterization
Industrial Stormwater Compliance
Investigation and Remediation Strategies
Litigation Support and Testifying Expert
CEQA Review**

Education:

M.S. Degree, Geology, California State University Los Angeles, Los Angeles, CA, 1984.

B.A. Degree, Geology, Humboldt State University, Arcata, CA, 1982.

Professional Certifications:

California Professional Geologist

California Certified Hydrogeologist

Qualified SWPPP Developer and Practitioner

Professional Experience:

Matt has 25 years of experience in environmental policy, assessment and remediation. He spent nine years with the U.S. EPA in the RCRA and Superfund programs and served as EPA's Senior Science Policy Advisor in the Western Regional Office where he identified emerging threats to groundwater from perchlorate and MTBE. While with EPA, Matt also served as a Senior Hydrogeologist in the oversight of the assessment of seven major military facilities undergoing base closure. He led numerous enforcement actions under provisions of the Resource Conservation and Recovery Act (RCRA) while also working with permit holders to improve hydrogeologic characterization and water quality monitoring.

Matt has worked closely with U.S. EPA legal counsel and the technical staff of several states in the application and enforcement of RCRA, Safe Drinking Water Act and Clean Water Act regulations. Matt has trained the technical staff in the States of California, Hawaii, Nevada, Arizona and the Territory of Guam in the conduct of investigations, groundwater fundamentals, and sampling techniques.

Positions Matt has held include:

- Founding Partner, Soil/Water/Air Protection Enterprise (SWAPE) (2003 – present);
- Geology Instructor, Golden West College, 2010 – 2014;
- Senior Environmental Analyst, Komex H2O Science, Inc. (2000 -- 2003);

- Executive Director, Orange Coast Watch (2001 – 2004);
- Senior Science Policy Advisor and Hydrogeologist, U.S. Environmental Protection Agency (1989–1998);
- Hydrogeologist, National Park Service, Water Resources Division (1998 – 2000);
- Adjunct Faculty Member, San Francisco State University, Department of Geosciences (1993 – 1998);
- Instructor, College of Marin, Department of Science (1990 – 1995);
- Geologist, U.S. Forest Service (1986 – 1998); and
- Geologist, Dames & Moore (1984 – 1986).

Senior Regulatory and Litigation Support Analyst:

With SWAPE, Matt’s responsibilities have included:

- Lead analyst and testifying expert in the review of over 100 environmental impact reports since 2003 under CEQA that identify significant issues with regard to hazardous waste, water resources, water quality, air quality, Valley Fever, greenhouse gas emissions, and geologic hazards. Make recommendations for additional mitigation measures to lead agencies at the local and county level to include additional characterization of health risks and implementation of protective measures to reduce worker exposure to hazards from toxins and Valley Fever.
- Stormwater analysis, sampling and best management practice evaluation at industrial facilities.
- Manager of a project to provide technical assistance to a community adjacent to a former Naval shipyard under a grant from the U.S. EPA.
- Technical assistance and litigation support for vapor intrusion concerns.
- Lead analyst and testifying expert in the review of environmental issues in license applications for large solar power plants before the California Energy Commission.
- Manager of a project to evaluate numerous formerly used military sites in the western U.S.
- Manager of a comprehensive evaluation of potential sources of perchlorate contamination in Southern California drinking water wells.
- Manager and designated expert for litigation support under provisions of Proposition 65 in the review of releases of gasoline to sources drinking water at major refineries and hundreds of gas stations throughout California.
- Expert witness on two cases involving MTBE litigation.
- Expert witness and litigation support on the impact of air toxins and hazards at a school.
- Expert witness in litigation at a former plywood plant.

With Komex H2O Science Inc., Matt’s duties included the following:

- Senior author of a report on the extent of perchlorate contamination that was used in testimony by the former U.S. EPA Administrator and General Counsel.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of MTBE use, research, and regulation.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of perchlorate use, research, and regulation.
- Senior researcher in a study that estimates nationwide costs for MTBE remediation and drinking water treatment, results of which were published in newspapers nationwide and in testimony against provisions of an energy bill that would limit liability for oil companies.
- Research to support litigation to restore drinking water supplies that have been contaminated by MTBE in California and New York.

- Expert witness testimony in a case of oil production-related contamination in Mississippi.
- Lead author for a multi-volume remedial investigation report for an operating school in Los Angeles that met strict regulatory requirements and rigorous deadlines.

- Development of strategic approaches for cleanup of contaminated sites in consultation with clients and regulators.

Executive Director:

As Executive Director with Orange Coast Watch, Matt led efforts to restore water quality at Orange County beaches from multiple sources of contamination including urban runoff and the discharge of wastewater. In reporting to a Board of Directors that included representatives from leading Orange County universities and businesses, Matt prepared issue papers in the areas of treatment and disinfection of wastewater and control of the discharge of grease to sewer systems. Matt actively participated in the development of countywide water quality permits for the control of urban runoff and permits for the discharge of wastewater. Matt worked with other nonprofits to protect and restore water quality, including Surfrider, Natural Resources Defense Council and Orange County CoastKeeper as well as with business institutions including the Orange County Business Council.

Hydrogeology:

As a Senior Hydrogeologist with the U.S. Environmental Protection Agency, Matt led investigations to characterize and cleanup closing military bases, including Mare Island Naval Shipyard, Hunters Point Naval Shipyard, Treasure Island Naval Station, Alameda Naval Station, Moffett Field, Mather Army Airfield, and Sacramento Army Depot. Specific activities were as follows:

- Led efforts to model groundwater flow and contaminant transport, ensured adequacy of monitoring networks, and assessed cleanup alternatives for contaminated sediment, soil, and groundwater.
- Initiated a regional program for evaluation of groundwater sampling practices and laboratory analysis at military bases.
- Identified emerging issues, wrote technical guidance, and assisted in policy and regulation development through work on four national U.S. EPA workgroups, including the Superfund Groundwater Technical Forum and the Federal Facilities Forum.

At the request of the State of Hawaii, Matt developed a methodology to determine the vulnerability of groundwater to contamination on the islands of Maui and Oahu. He used analytical models and a GIS to show zones of vulnerability, and the results were adopted and published by the State of Hawaii and County of Maui.

As a hydrogeologist with the EPA Groundwater Protection Section, Matt worked with provisions of the Safe Drinking Water Act and NEPA to prevent drinking water contamination. Specific activities included the following:

- Received an EPA Bronze Medal for his contribution to the development of national guidance for the protection of drinking water.
- Managed the Sole Source Aquifer Program and protected the drinking water of two communities through designation under the Safe Drinking Water Act. He prepared geologic reports, conducted public hearings, and responded to public comments from residents who were very concerned about the impact of designation.

- Reviewed a number of Environmental Impact Statements for planned major developments, including large hazardous and solid waste disposal facilities, mine reclamation, and water transfer.

Matt served as a hydrogeologist with the RCRA Hazardous Waste program. Duties were as follows:

- Supervised the hydrogeologic investigation of hazardous waste sites to determine compliance with Subtitle C requirements.
- Reviewed and wrote "part B" permits for the disposal of hazardous waste.
- Conducted RCRA Corrective Action investigations of waste sites and led inspections that formed the basis for significant enforcement actions that were developed in close coordination with U.S. EPA legal counsel.
- Wrote contract specifications and supervised contractor's investigations of waste sites.

With the National Park Service, Matt directed service-wide investigations of contaminant sources to prevent degradation of water quality, including the following tasks:

- Applied pertinent laws and regulations including CERCLA, RCRA, NEPA, NRDA, and the Clean Water Act to control military, mining, and landfill contaminants.
- Conducted watershed-scale investigations of contaminants at parks, including Yellowstone and Olympic National Park.
- Identified high-levels of perchlorate in soil adjacent to a national park in New Mexico and advised park superintendent on appropriate response actions under CERCLA.
- Served as a Park Service representative on the Interagency Perchlorate Steering Committee, a national workgroup.
- Developed a program to conduct environmental compliance audits of all National Parks while serving on a national workgroup.
- Co-authored two papers on the potential for water contamination from the operation of personal watercraft and snowmobiles, these papers serving as the basis for the development of nation-wide policy on the use of these vehicles in National Parks.
- Contributed to the Federal Multi-Agency Source Water Agreement under the Clean Water Action Plan.

Policy:

Served senior management as the Senior Science Policy Advisor with the U.S. Environmental Protection Agency, Region 9. Activities included the following:

- Advised the Regional Administrator and senior management on emerging issues such as the potential for the gasoline additive MTBE and ammonium perchlorate to contaminate drinking water supplies.
- Shaped EPA's national response to these threats by serving on workgroups and by contributing to guidance, including the Office of Research and Development publication, *Oxygenates in Water: Critical Information and Research Needs*.
- Improved the technical training of EPA's scientific and engineering staff.
- Earned an EPA Bronze Medal for representing the region's 300 scientists and engineers in negotiations with the Administrator and senior management to better integrate scientific principles into the policy-making process.
- Established national protocol for the peer review of scientific documents.

Geology:

With the U.S. Forest Service, Matt led investigations to determine hillslope stability of areas proposed for timber harvest in the central Oregon Coast Range. Specific activities were as follows:

- Mapped geology in the field, and used aerial photographic interpretation and mathematical models to determine slope stability.
- Coordinated his research with community members who were concerned with natural resource protection.
- Characterized the geology of an aquifer that serves as the sole source of drinking water for the city of Medford, Oregon.

As a consultant with Dames and Moore, Matt led geologic investigations of two contaminated sites (later listed on the Superfund NPL) in the Portland, Oregon, area and a large hazardous waste site in eastern Oregon. Duties included the following:

- Supervised year-long effort for soil and groundwater sampling.
- Conducted aquifer tests.
- Investigated active faults beneath sites proposed for hazardous waste disposal.

Teaching:

From 1990 to 1998, Matt taught at least one course per semester at the community college and university levels:

- At San Francisco State University, held an adjunct faculty position and taught courses in environmental geology, oceanography (lab and lecture), hydrogeology, and groundwater contamination.
- Served as a committee member for graduate and undergraduate students.
- Taught courses in environmental geology and oceanography at the College of Marin.

Matt taught physical geology (lecture and lab and introductory geology at Golden West College in Huntington Beach, California from 2010 to 2014.

Invited Testimony, Reports, Papers and Presentations:

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Presentation to the Public Environmental Law Conference, Eugene, Oregon.

Case Planner: Carlos Contreras

Noreen Murano, Amanda Gibbs, Wildscape Restoration

SUBJECT: Findings and Recommendations PTP 2023-70067 (500 E Thousand Oaks Blvd)

Bottom Line: Three trees under 1" diameter are not protected: #19, 45, and 53. We need either graphic illustrations (plans or sections) or written information that explains why each protected tree is being removed. Are trees 8, 15, and 18 on the lot? Explain why eight young oaks cannot be boxed and replanted: #11, 12, 41, 42, 10, 17, 23, and 30. See my comments below.

Protected Tree Report-500 Thousand Oaks_BLVD_Arborist_Report_September_Submittal-2023-10-23_v2.pdf
8 MB

Hi John,

Attached is V2 of the subject project's tree report. Please provide your recommendations to ME by November 14, 2023.

Thank you!

Adrienne Sosner (she, her)

Findings:

The report indicates forty-one protected trees grow on site or within 50 feet of the site plan limits. Twenty-nine will be removed, seven will be encroached upon, and five will be protected in place without encroachment. Two trees larger than 24" DBH will be removed #14 and 50. Given the size and number of tree to be removed, this case it must go to the Planning Commission. The Commission may approve, conditionally approve, or deny the permit application.

It looks like only 38 protected oaks grow on site. Trees less than 2" DBH such as #53, 45 and 19 are not protected. This reduces the required mitigation by nine trees.

Sec. 9-4.4205. Exemptions.

- (a) Exemptions. A permit is not required to cut, remove, or encroach within the protected zone of any oak tree(s) under the following circumstances.
 - (1) Trees that do not exceed two (2") inches in diameter when measured at a point four and a half (4-1/2') feet above the tree's natural grade.
 - (2) Ground plane improvements that are proposed between the dripline and the protected zone limit.
 - (3) Clearance pruning that involves removal of live branches that do not exceed two (2") inches in diameter, except in conjunction with any new construction activity.
 - (4) Deadwooding.

The planning commissioners will want to be sure the proposed plan reduces to an absolute minimum the number of healthy oak trees that would be impacted or removed. Based on the report and plans provided it is not clear to me why all twenty-six protected trees are being removed. The report says this decision was made in consultation with the project engineer but doesn't explain the engineers' rationale. The tree map does not clearly show the existing and proposed grading, making it hard to see why some trees are being removed, especially around the perimeter. I need more information to review this request.

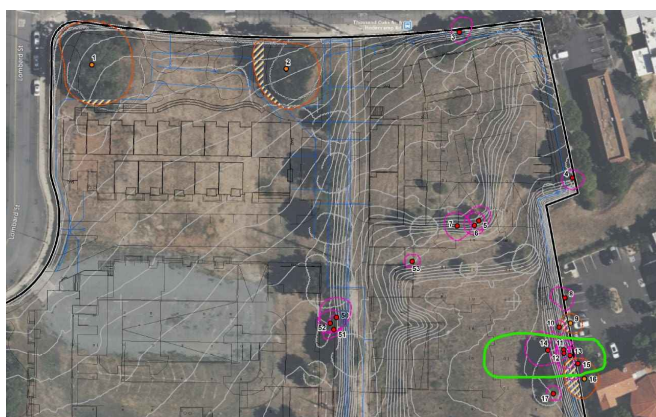

Most of the questions I have about impact could be answered by showing the tree graphics on the proposed grading plan because it would show existing and proposed grades and labels for new structures and utilities. It would show what is happening around the perimeter of the property.

Does a property line wall displace tree #4?

Are trees 8, 15, and 18 on the lot? That is not clear on this plan. If the trunk is primarily on the adjacent lot, then the applicant may not be able to remove it without consent.

The plan shows some trees are displaced by buildings but around the edges of the site it is not clear what displaces trees on the east side in the center such as 11, 12, 13, 14, and 15. See blow-up from the tree map below.

Rational for removing trees 11, 12, 13, 14, 15.

Why are trees on the far west side of the site being removed? What is displacing them? Where is tree 41?

We need either graphic illustrations (plans or sections) or written information that explains why each protected tree is being removed. Showing the trees and canopies on the proposed grading plan would help. In some cases, it may not be clear from the proposed grading plan what new structure is removing the tree or why grading is causing a tree to be removed. In such cases additional information may be needed to explain why the tree cannot be preserved.

If the engineer finds it is necessary to grade the entire site including the edges that should be explained.

Eight trees to be removed appear to fit the criteria for relocation shown on page 19 of the report. Four of them have a 2 inch trunk and a five foot wide canopy. They are described as in fair health: #11, 12, 41, and 42. Another four have 3" trunks and 10 foot wide canopies #10, 17, 23, and 30. The report should explain why these eight young oaks cannot be boxed and replanted. Are the trees on a slope? Is there something preventing the trees from being boxed properly? Is there room to store the trees properly during demolition and construction?

The staff may be able to approve boxing two of these trees instead of providing two 60" box trees to mitigate for trees #14 and 50.

In addition to the tree protection plan included in the report, the applicant will have to follow all the protection requirements shown in the REVISED OAK TREE PRESERVATION AND PROTECTION GUIDELINES, section V. Standard Policies — Requirements and Procedures. Including:

On - Site Supervision All work conducted within the protected zone of the oak tree, unless otherwise listed as exempt by Title 5, Chapter 14 of the Municipal Code or these Guidelines, will be performed in the presence of the applicant's oak tree preservation consultant.

Recommendations:

1. Trees 19, 45, and 53 have 1" diameters and are not protected. Revise the count and the mitigation.
2. Determine whether trees 8, 15, and 18 are on the lot. If the trunk is primarily on the adjacent lot, then the applicant may not be able to remove it without the consent of the adjacent owner.
3. Provide either graphic illustrations (plans or sections) or written information that explains why each protected tree is being removed.
4. The report should explain why eight young oaks cannot be boxed and replanted: #11, 12, 41, 42, 10, 17, 23, and 30.

Hi John,

Attached is another tree report for 500 E Thousand Oaks Blvd (PTP 2023-70067). We are under the gun on this project, we'd appreciate a turn around as quickly as possible.

Appreciate you!
Adrienne

Name	City	Item #	In favor/ Opposed	Comment
Rick Schroeder	Thousand Oaks	10A	In favor	<p>We support the actions sought by the applicant at Tuesday's hearing and as set forth in Item 10 (A).</p> <p>The City of Thousand Oaks needs more affordable housing. The proposed project includes 44 units of new affordable housing—all units restricted to households at or below 80% Area Median Income ('low-income'). It is becoming increasingly difficult to develop affordable housing in this City. While state and federal affordable housing financing sources have increased, these funding sources do not favor suburban cities such as Thousand Oaks, given its high land costs, low densities, and lack of public transportation.</p> <p>Therefore, the City should take advantage of the development of such affordable housing as included in larger non-affordable housing developments.</p> <p>The City of Thousand Oaks simply needs more housing. The mere shortage of housing in the City places tremendous pressure on housing costs and rents and impacts overall available affordable housing. The lack of any new housing forces homeowners and renters to 'crowd out' low-income residents and drives up rents. The average rent for a two-bedroom apartment unit in Thousand Oaks now exceeds \$2,700.</p> <p>The proposed project adds 328 units of housing to the City's housing stock. This project, along with other current residential developments in the City, will help lower overall rents and thus make existing housing more affordable. The beautiful design, proposed retail, and other amenities make the proposed project a welcome addition to the City of Thousand Oaks.</p> <p>We support the proposed action. --Rick Schroeder, President & CEO Many Mansions</p>
